## A Product of Quality

It costs more to produce a high-grade article than one of ordinary quality. The reason is apparent to everyone. If we put out the same quality of milk and cream as many dairies do, it is possible that we might do it a little cheaper. But, Madam, would you not rather pay a cent or two more and get milk that will stand every test of 'purity?' We believe you would. That is why we use every precaution to safeguard the health of the little ones by Pasteurizing and Clearifying every drop we put out. It costs us money to do it, but we think you appreciate our efforts.
